1.

The screenshot displays the Visual Studio IDE with a C# program named 'HelloWorld' in 'Program.cs'. The code defines a class 'HelloWorld' with a static 'Main' method that prints two lines: 'Hello, C#!' and 'Welcome to Data Structures and Algorithms'. Below the code editor, the 'Microsoft Visual Studio Debug' console window is open, showing the program's output: 'Hello, C#!' followed by 'Welcome to Data Structures and Algorithms'. The console also displays a message indicating that the process 'Test1.exe' exited with code 0 (0x0) and provides instructions on how to automatically close the console when debugging stops.

```
public class HelloWorld
{
    public static void Main(string[] args)
    {
        Console.WriteLine("Hello, C#!");
        Console.WriteLine("Welcome to Data Structures and Algorithms");
    }
}
```

Hello, C#!
Welcome to Data Structures and Algorithms
C:\Users\12584786\source\repos\Test1\bin\Debug\net8.0\Test1.exe (process 4984) exited with code 0 (0x0).
To automatically close the console when debugging stops, enable Tools->Options->Debugging->Automatically close the console when debugging stops.
Press any key to close this window . . .|

The screenshot shows the Visual Studio IDE with a C# program named `Program.cs` in a project called `Test1`. The code defines a `HelloWorld` class with a `Main` method that writes five lines of text to the console. The output window at the bottom shows the execution results, including the printed text and a message that the process exited successfully.

```
1 using System;
2
3
4 public class HelloWorld
5 {
6     public static void Main(string[] args)
7     {
8         Console.WriteLine("Yshmael Jephthah Bigtas");
9         Console.WriteLine("26");
10        Console.WriteLine("BSIS");
11        Console.WriteLine("De Lasalle Benilde Antipolo");
12        Console.WriteLine("Paksiw");
13    }
14 }
```

Yshmael Jephthah Bigtas
26
BSIS
De Lasalle Benilde Antipolo
Paksiw

C:\Users\12584786\source\repos\Test1\bin\Debug\net8.0\Test1.exe (process 24996) exited with code 0 (0x0).
To automatically close the console when debugging stops, enable Tools->Options->Debugging->Automatically close the console when debugging stops.
Press any key to close this window . . .|

The screenshot shows the Visual Studio IDE with a C# program named `Program.cs` open. The code defines a `HelloWorld` class with a `Main` method that uses `Console.WriteLine` to display a student profile form. The form consists of several lines of text with underscores for input, separated by equals signs. The output window on the right shows the program's execution, displaying the same form structure. The file explorer on the left shows the project structure with `Test1` and `HelloWorld` folders.

```
1 using System;
2
3
4 0 references
5 public class HelloWorld
6 {
7     0 references
8     public static void Main(string[] args)
9     {
10         Console.WriteLine("=====\n");
11         Console.WriteLine("Student Profile\n");
12         Console.WriteLine("=====\n");
13         Console.WriteLine("Name: _____\n");
14         Console.WriteLine("Age: _____\n");
15         Console.WriteLine("Course: _____\n");
16         Console.WriteLine("Year Level: _____\n");
17         Console.WriteLine("Section: _____\n");
18         Console.WriteLine("=====\n");
19     }
20 }
```

Microsoft Visual Studio Debug Console

```
=====  
Student Profile  
=====  
Name: _____  
Age: _____  
Course: _____  
Year Level: _____  
Section: _____  
=====

The screenshot shows the Visual Studio IDE with a C# program named `Program.cs` and its debug output in the `Microsoft Visual Studio Debug Console`.

Program.cs Code:

```
1 using System;
2
3
4 public class HelloWorld
5 {
6     0 references
7     public static void Main(string[] args)
8     {
9         Console.WriteLine("=====\n");
10        Console.WriteLine("Menu\n");
11        Console.WriteLine("=====\n");
12        Console.WriteLine("1. Burger      PHP 120\n");
13        Console.WriteLine("2. PIZZA      PHP 180\n");
14        Console.WriteLine("3. Pasta      PHP 150\n");
15        Console.WriteLine("4. Soft Drink  PHP 60\n");
16        Console.WriteLine("=====\n");
17        Console.WriteLine("Thank you for visting! DONT COME BACK!!!\n");
18    }
```

Debug Console Output:

```
=====  
Menu  
=====  
1. Burger      PHP 120  
2. PIZZA      PHP 180  
3. Pasta      PHP 150  
4. Soft Drink  PHP 60  
=====  
Thank you for visting! DONT COME BACK!!!  
  
C:\Users\12584786\source\repos\Test1\bin\Debug\net8  
To automatically close the console when debugging s  
le when debugging stops.

The screenshot displays the Visual Studio IDE with a C# program named `Program.cs` and its execution output in the `Microsoft Visual Studio Debug Console`.

Program.cs Code:

```
1 using System;
2
3
4 public class HelloWorld
5 {
6     0 references
7     public static void Main(string[] args)
8     {
9         Console.WriteLine("*****\n");
10        Console.WriteLine("MARIA SANTOS\n");
11        Console.WriteLine("Marketing Managager\n");
12        Console.WriteLine("*****\n");
13        Console.WriteLine("Email: maria@email.com\n");
14        Console.WriteLine("Phone: 0912-345-6789\n");
15        Console.WriteLine("Company: ABC Marketing\n");
16        Console.WriteLine("Location: Manila\n");
17        Console.WriteLine("*****\n");
18    }
19 }
```

Debug Console Output:

```
*****
MARIA SANTOS
Marketing Managager
*****
Email: maria@email.com
Phone: 0912-345-6789
Company: ABC Marketing
Location: Manila
*****

C:\Users\12584786\source\repos\Test1\bin\Debug\net8.0\Te
To automatically close the console when debugging stops,
